Hannah-Rhys Kakisina

BSc Student Electrical Engineering

I started engineering, because I wished to create.
I like taking care of people and things and watching my hard work blossom into something I'm proud of.

Practical

Date of Birth

Birth Name   Hannah Kakisina

Driving   No

Education

Bachelor of Science - Electrical Engineering
Technical University of Delft

Student Committees - Inclusivity & Sustainability
Extracurricular subjects - Machine Learning
Specialisation - Biomedical Signal Processing

Linked Experience
Promotional work, Teaching, Organisation & Engineering

Workplaces

Promotional Team Member
FlexDelft

~4 years,   Oct 2021 - current

With my team, I am responsible for the organisation and execution of promotional events for my study and the faculty.

Work Included
- Giving online presentations
- Presenting Q&A's
- Giving college presentations
- Standing at information markets
- Scheduling shadow days
- Showing potential students around

Sustainability Team Archivist
TU Delft

19 months,   May 2022 - Nov 2024

With my team, I organised some sustainability activities and projects around the campus.

Work Included
- Building a network
- Mailing People
- Organising activities
- Looking for funds
- Organizing Team Archives

Teaching Assistent
TU Delft - Department of Microelectronics

2 academic years,   2021-2023

I graded and assisted students for labsessions for courses of the microelectronics department. Additionally, I have fullfilled an educational role with technical demonstrations and instructions.

Work Included
- Evaluating student work
- Giving demonstrations
- Providing feedback
- Providing aid in busy understaffed labs
- Preventing student-caused equipment explosions

Other Experience

Arts
Boat Maintenance & Decoration

I used to sail and take care of my own boat, meanwhile I loved painting little Easter eggs all over the boat. I like working and caring for things that will serve a purpose.

Digital Art

I have a couple digital art projects that I enjoy:
- Digital **drawing**
- **Designing logos** and icons for personal use
- Make fun and **personal Christmas cards** for my friends and family
- Making **cute sticker designs** for my amateur pride sticker shop

Product Design

I love building things. I am currently trying to **design a speaker system** from scratch inspired by my first year uni speaker design project.

Web Design

I just started constructing a fun **personal website** about all my side quests for just me and my friends.

Playing Instruments

I highly enjoy learning, so I'm currently learning to play the **electric guitar** and **drums**. I am no good at either of them yet, but I like the process.
